

# Gas Detection and Qualified Tester for Industry in British Columbia

**4 HOUR OPERATIONS COURSE**

By the end of this Gas Detection and Qualified Tester Centre Basics course you will be able to:

- ▶ The Operating Principles of Atmosphere Monitoring and Measuring equipment.
- ▶ Gas Detector Pre-start Checks, Bump Testing and Calibrating.
- ▶ The Behaviour of Different Flammable and Toxic Gases.
- ▶ The Range and Frequency of Tests and Interpreting and Documenting Test Results.
- ▶ The Principles of Gas Testing as Applied to Confined Space Entry and Hot Work Activities.

This Gas Detection and Qualified Tester course has been designed for those who operate gas detection instruments to test for potentially dangerous gases during confined space entry and during hot work operations. Gas detection tests must be carried out by a qualified person who has training and experience to calibrate, operate and monitor testing equipment. The qualified tester must also be capable to interpret the readings obtained from gas detection equipment.

This Gas Detection and Qualified Tester course will also establish an understanding of the statutory requirements of the federal COHS, Provincial and Territorial OH&S legislations.

We will achieve this through discussion of gas detection fundamentals and by participating in skills practice exercises.

## OH&S SAFETY CONSULTING AND TRAINING SOLUTIONS LTD.

OH&S Safety Consulting and Training Solutions is a leading provider of industrial safety training, consultation, and equipment in Kamloops and the rest of Western Canada.

Our goal is to provide you with the most current and up to date training available in all aspects of Work Place Safety. The Certifications you will receive from OH&S will be Nationally Accredited and allow you to work safely on job sites across Canada.

Our selection of safety courses and training offer you nationally accredited training that is both comprehensive and easy to understand. We strive to make the learning experience comfortable and convenient. This means going above and beyond in making sure that our students understand the curriculum and are able to demonstrate competency in their performance.

### ON-SITE TRAINING

Phone and ask us about safety courses and training conducted at your workplace. Even if you need a course that is not currently on our calendar, we will try our hardest to help you meet your training needs. We strive to be a flexible training provider and that means providing our clients with high quality training when and where they need it.

### COURSE DEVELOPMENT

Does your business need fully customized safety courses and training? Or do none of the current course offerings fit your needs? Ask us about customized and professional course development for your workplace. We will incorporate materials and information related to the work you do. Custom training is more engaging because employees see the relevance and applicability of what they learn.
