

Air Supplying Respirator Protection User Basics & Fit Testing Competencies

4 HOUR COURSE - Including Fit Testing

This Air Supplying Respirator Protection Basics training program has been designed for those with an occupational requirement to be trained to safely undertake work activities that involve the use of air supplying respirator protection.

Every worker who may be required to wear an air supplying respirator must be trained in the proper use of the respirator to ensure the workers ability to work safely in a hazardous area.

This Air Supplying Respirator Protection course will also establish an understanding of the statutory requirements of the federal COHS, Provincial and Territorial OH&S legislations.

We will achieve this through discussion and by participating in skills practice and fit testing evaluation.

This course will provide the participant with the necessary knowledge regarding:

- ▶ Hazards Present & Potential Effects.
- ▶ Capabilities & Limitations of air supplying Respirators.
- ▶ Selection Criteria, Inspection & Maintenance.
- ▶ Cleaning & Storage Methods.
- ▶ Donning of the Air Supplying Respirator & Seal Check.
- ▶ Fit Testing & Medical Assessment.
- ▶ Proper use of the Air Supplying Respirator.

OH&S SAFETY CONSULTING AND TRAINING SOLUTIONS LTD.

OH&S Safety Consulting and Training Solutions is a leading provider of industrial safety training, consultation, and equipment in Kamloops and the rest of Western Canada.

Our goal is to provide you with the most current and up to date training available in all aspects of Work Place Safety. The Certifications you will receive from OH&S will be Nationally Accredited and allow you to work safely on job sites across Canada.

Our selection of safety courses and training offer you nationally accredited training that is both comprehensive and easy to understand. We strive to make the learning experience comfortable and convenient. This means going above and beyond in making sure that our students understand the curriculum and are able to demonstrate competency in their performance.

ON-SITE TRAINING

Phone and ask us about safety courses and training conducted at your workplace. Even if you need a course that is not currently on our calendar, we will try our hardest to help you meet your training needs. We strive to be a flexible training provider and that means providing our clients with high quality training when and where they need it.

COURSE DEVELOPMENT

Does your business need fully customized safety courses and training? Or do none of the current course offerings fit your needs? Ask us about customized and professional course development for your workplace. We will incorporate materials and information related to the work you do. Custom training is more engaging because employees see the relevance and applicability of what they learn.
