

# Pipeline Construction Safety Orientation

*Field Safety, Public Security and the Environment*

**4 HOUR COURSE**

This pipeline construction safety course has been designed as an orientation for those with an occupational requirement to safely undertake pipeline construction work activities and is also intended for personnel who are required to supervise pipeline construction operations.

The goal of this course is to help you better understand what your responsibilities are and how to manage those responsibilities to protect your health and safety as well as the health and safety of your co-workers.

Pipeline Construction Safety Orientation course will also establish an understanding of the statutory requirements of the federal COHS, Provincial and Territorial OH&S legislations.

We will achieve these objectives through classroom discussion.

The pipeline construction community includes anyone who engages in, or who is responsible for construction activities that include but are not limited to surveying, staking, tree falling, right-of-way clearing, drilling, blasting, trench ditching, lifting pipe, stringing pipe, bending pipe, welding pipe, coating pipe, testing pipe, trench backfilling, site clean-up and reclamation.

There are more than 840,000 km of transmission, gathering and distribution pipelines in Canada including 117,000 km of large-diameter transmission lines with most provinces having significant pipeline infrastructure.

Of this amount, about 73,000 km are federally regulated pipelines.

**OH&S Safety Consulting and Training Solutions Ltd.**

*Head Office:* 825 – J Laval Crescent, Kamloops, BC V2C 5P2 ph: (778) 471-6407

## **OH&S SAFETY CONSULTING AND TRAINING SOLUTIONS LTD.**

OH&S Safety Consulting and Training Solutions is a leading provider of industrial safety training, consultation, and equipment in Kamloops and the rest of Western Canada.

Our goal is to provide you with the most current and up to date training available in all aspects of Work Place Safety. The Certifications you will receive from OH&S will be Nationally Accredited and allow you to work safely on job sites across Canada.

Our selection of safety courses and training offer you nationally accredited training that is both comprehensive and easy to understand. We strive to make the learning experience comfortable and convenient. This means going above and beyond in making sure that our students understand the curriculum and are able to demonstrate competency in their performance.

### **ON-SITE TRAINING**

Phone and ask us about safety courses and training conducted at your workplace. Even if you need a course that is not currently on our calendar, we will try our hardest to help you meet your training needs. We strive to be a flexible training provider and that means providing our clients with high quality training when and where they need it.

### **COURSE DEVELOPMENT**

Does your business need fully customized safety courses and training? Or do none of the current course offerings fit your needs? Ask us about customized and professional course development for your workplace. We will incorporate materials and information related to the work you do. Custom training is more engaging because employees see the relevance and applicability of what they learn.
